CAUSE OF DISEASE

Frightening as today's long list of named disease is, we must remember that the Almighty still puts in every human the power to keep healthy.

A living tissue has a life-giving connection with brain it is not because something is wrong with IT. Rather there has been some interescrence in the CONNECTION between the brain and tissue. In other words something has to go wrong inside the body before germs take hold. Then their presence is a result of sickness . . . not the CAUSE.

Fevers, pains, organic and infectious conditions indicate something has occurred to upset the normal flow of nerve energy from the brain to body tissues.

This something according to fifty years research is nearly ALWAYS a spinal subluxation involving the main nervous system. By using skill and modern scientific instruments, a chirophactor can locate and correct these
